BIRD OF PARADISE (Sommer-'53)

You will look the second time before recognizing it as a Glad. Florists have shown some special interest in this novelty as something different to work with. At the 1953 Minnesota Show it won Grand Championship of Arrangements. In 1952 it was a winner as a three-spike seedling at the Minnesota State Show. The plant grows to 50 inches tall and the blooms are 7 to 8 inches across and the originator says he has had them 8½ inches. Saucer-shaped, no spurs, is heavily lacinated, and very heavy substance. Gail—See page 6.

BRIDAL ORCHID (Carlson-'50) 85 days-566

Bridal Orchid is tops in commercial qualities as it has vigorous, fine, clean foliage, and produces firm, healthy bulbs and many bulblets which germinate easily. But it also has the necessary size, length, beauty of color and florets to make it an excellent flower for home use and winner on the show tables. Color is lovely lavender, lighter deep in the throat. Will open 6 on a 21-bud spike with perfect placement.
(L. 2-35c; 10-\$1.40) (M. 2-25c; 10-\$1.00) (Blbts. 25-25c)

CRINKLE CREAM (Ellis-'40) 86 days-410

Very large, light yellow; ruffled.

CRYSTAL ORCHID (Browne-'52) 92 days-506

I would place this marvelous variety in the (506) cream class instead of the white (500) as formerly. Creamy white with lavender feather, very heavily ruffled and needle-pointed petals. Has won several top awards, including grand champions. Spike straight as spires and a beautiful sight in our plantings. This is the type we like to grow.

(L. ea. 20c; 10-\$1.60) (M. 2-30c; 10-\$1.20) (S. 10-80c) (Blbts. 15-20c; 100-\$1.00)

EDGEWOOD (Torrie-Flad) 461

Tall, medium rose with rose-lavender feather. 8 nicely ruffled blooms open on a 20-bud spike. Will make a grand cut-flower variety when stock is available.

ELMER'S ROSE (Fischer-'51) 85 days-460

Rose with heavy substance and intense ruffling. 5 feet tall with a stretchy flower head of 20-22 buds. Opens 8 large florets with excellent placement and facing. This is one of the most outstanding of the recent introductions.

ELIZABETH THE QUEEN (White-'41) 86 days-566

This is the most useful variety we know. It gives beautiful spikes under almost every condition. It's a beautiful lavender nicely ruffled and needle-pointed. If water and fertilizer are applied just as the bud spikes leave the sheath, the spikes will have better stretch.

EVANGELINE (Palmer-'48) 92 days-540

Light rose-pink with large ruffled 5½-inch florets and a soft cream throat. 25- to 30-inch flower head. 18-20 buds and 8 to 12 open. A consistent winner of high awards.

FANTASY (Rich-'52) 90 days

This Glad has a similar combination of coloring and type of bloom as the Parrot Tulip. Beautiful peach-pink with chartreuse spurs on the back which carry their exotic coloring through the petals to the front. The texture, fluting, and ruffling is exceptionally heavy. Grows about 50 inches high, 22-inch flower head. 5-inch blooms with 16-17 buds and opens 6 to 7 blooms. Makes beautiful arrangements and corsages.

(L. ea. \$1.00; 10-\$8.00) (M. ea. 50c; 10-\$4.00) (S. ea. 25c; 10-\$2.00)

FIREBRAND (Butt-'50) 90 days-560

Glistening medium red blending to a slightly darker throat. Opens 10 regularly spaced blooms with firm attachment and makes an excellent Glad for home, show or commercial use.

FLORENCE NIGHTINGALE (Harris-'47) 88 days-400

Finest Canadian white and probably the best cut and show flower in the white class of all time. 66 inches tall, 8 open on 22-bud spike. Straight, frilled florets in perfect placement. Marvelous cutter, excellent propagator and just good in every way.

Columbia

FORSYTHIA (Harris-'52) 80 days-512

This has proven one of the finest yellows in commerce. 55 inches tall with a 26-inch flower head, 5½-inch florets, 20 buds, 8 open and 8 in color. Ruffled, fluted, stands heat and drought well and rated highly by all who have seen it.

(L. ea. 50c; 10—\$4.00) (M. ea. 35c; 10—\$2.80) (S. ea. 20c; 10—\$1.60) (Blbts. 10—20c)

FRASER (Harris-'50) 90 days-432

Deep salmon with deeper throat. Heavily ruffled. Grows 56 inches tall with 8 florets open on a 22-inch flower head. Excellent for commercial or exhibition use.

FRIENDSHIP (Fischer-'49) 70 days-442

An exceptionally healthy grower and one of the earliest to bloom in our fields. It is tall with 6 to 7 blooms open on a strong but slender stem. Color is medium pink and nicely ruffled. A beautiful variety any season.

GAIL (Farrington-'49) 85 days-466

Light lavender shading to deep lavender at the petal edges with a light penciling of rose-cerise on the lower petals deep in the throat. Consistently tall grower, produces stretchy spike with 7 to 9 open. Never crooks or flakes and will open clear to the tip in water keeping its size and color.

(L. ea. 20c; 10—\$1.60) (M. 2—30c; 10—\$1.20) (S. 2—20c; 10—80c) (Blbts. 25—25c; 100—80c)

GARNET RUFFLES (Maynard-'53) 85 days-352

Clear, clean deep rich velvety red, ruffled and fluted with a fringe of silver, almost self and a beautiful color. 4-inch florets on a 19-bud spike with 8 open and 8 showing color. Flower head 21-26 inches, height 50 inches. Originator says it's in a class where it cannot be beat.

(L. ea. \$1.00; 10—\$8.00) (M. ea. 75c; 10—\$6.00) (S. ea. 40c; 10—\$3.20) (Blbts. 15—\$1.00; 100—\$5.00)

GAYSPOT (Kadel-'53) 411

Here is a variety that has had more than its share of awards. It has a clean, medium yellow color, shading to a deeper throat. The throat is marked with a conspicuous red blotch. It opens 7 florets and 6 more showing color on a 20-bud spike. Foliage is heavy and deep green in color. The stem is tall and strong, over-all height being 54 inches. We believe Gayspot is a superior cut flower.

(L. ea. \$3.00; 10—\$24.00) (M. ea. \$2.00; 10—\$16.00) (S. ea. \$1.00; 10—\$8.00) (Blbts. 2—50c)

GENE (Farrington-'49) 80 days-410

Intensely ruffled medium yellow with excellent placement. Opens 6 to 8 florets and sometimes more which are beautifully placed and firmly attached to the stem. A marvelous advance in the yellow class.

GENERAL EISENHOWER (Salman-'48) 85 days-542

Deep rose in a brilliant clean shade with exceptionally large florets occasionally reaching 7 inches in diameter. Has good placement and attachment and is in demand for commercial cut flowers.

GOLD (Marshall-'51) 80 days-412

Deep yellow that opens 6 nicely ruffled, round, open florets. Seedling of Orange Gold and carries many of its good qualities in plant, flower head and floret attachment. Has won many championships and blue ribbons at major shows.

(L. ea. 25c; 10—\$2.00) (M. 2—35c; 10—\$1.40) (S. 2—25c; 10—\$1.00) (Blbts. 20—25c)

GOLD BOND (Harris-'53) 88 days-510

I would call this a 500 as it grows for us. Could be the best large yellow I have seen. Grows to 66 inches and has a 26-inch flower head. 8 open, 6 in color on a 20-bud spike. A rich canary-yellow ruffled, heavy textured. No throat marks, just clean, clear yellow throughout.

(L. ea. \$1.00; 10—\$8.00) (M. ea. 75c; 10—\$6.00) (S. ea. 35c; 10—\$2.80) (Blbts. 10—85c; 100—\$6.50)

GRACE DARLING (Harris-'48) 85 days-460

A lovely blend of rosy pink and white. Tall grower up to 60 inches, and will open eight 5-inch florets on a 26-inch flower head. Good attachment and excellent texture.

(L. 2—30c; 10—\$1.20) (M. 2—20c; 10—80c) (Blbts. pkg. 25c)

GWEN (Pickell-'49) 80 days-560

One of the first commercially valuable fragrant Glads. Light rose in color with darker throat markings. Grows tall and straight and will open 6 to 8 beautiful florets that will stand handling and will win on the show table. It cuts 100% usable spikes and is one of the best in our Trial Garden this year.

(L. ea. 20c; 10—\$1.60) (M. 2—30c; 10—\$1.20) (S. 2—20c; 10—80c) (Blbts. 20—25c)

HARRY HOPKINS (Salman-'47) 85 days-462

Deep rose with slightly purplish shading. It will open 6 to 8 well placed blooms on a tall, straight stem. A very choice variety.

HEIRLOOM (Klein-'51) 80 days-566

Rose-orchid in color, slightly ruffled, crystal clear with absolutely no flecking. Color alone makes it outstanding. Makes 5-foot tall spikes with 23 to 25 buds. Will open ten 5½-inch florets with others showing color. Opens well when cut in tight bud. Has won awards wherever shown.

(L. ea. \$1.00; 10—\$8.00) (M. ea. 75c; 10—\$6.00) (S. ea. 50c; 10—\$4.00) (Blbts. 4—25c; 100—\$5.00)

HOWARD V. WRIGHT (Kadel-'51) 82 days-410

Here is a light yellow with a somewhat deeper throat. It opens 5-inch florets with 5 or more showing color on a 20-bud spike. Flower head averages 29 inches. Wide open florets have plain recurved petals, on a strong and vigorous plant.

(L. ea. \$1.00; 10—\$8.00) (M. ea. 75c; 10—\$6.00) (S. ea. 50c; 10—\$4.00) (Blbts. 4—25c; 100—\$5.00)

JULIA MAE (Pommert-'53) 74 days-460

This variety turned out to be one of the best in the trial gardens last year and again this year. It is a pinkish lavender near self color, grows about 5 feet tall, has 6 to 8 open at a time. Opens perfectly from tight bud, stands heat well, is a fast propagator. A good commercial variety as well as exhibition.

DUST AND SPRAY FOR INSECT CONTROL

We have found DDT to be the most effective material for control of thrips. It should be used as a dust at digging time and again at cleaning. During the growing season the plant should be dusted every 7-10 days from the time the plant is 6-10 inches high until the blooms open. Wettable DDT (DDT-50-W) diluted to 5% strength can be used as a spray instead of a dust in the field.

DUST FOR CONTROL IN STORAGE

Tests show that either Arasan or Spergon dusted on Gladiolus bulbs at digging time, and again after cleaning when they are put away for the winter, materially checks the advance of the fungus type of Gladiolus disease. These have been recommended as a dust treatment to replace the dip method of using New Improved Ceresan. Just dust the bulbs heavily and plant, and the dust will tend to immunize the bulb. Wettable Spergon can be used if the dip method is preferred.

SPERGON GLADIOLUS DUST

A mixture of Spergon (a fungicide) and DDT. If you use this you do not need to use DDT dust in storage. Dust at digging time and again at cleaning time.

A beautiful ruffled deep purple blending to a slightly darker throat. Opens 5 to 6 blooms on a long flower head. One of the best purples.

SIERRA SNOW (Harris-'51) 80 days-400

A billowing white of marvelous texture, grows 66 inches tall easily, with 30-inch flower heads, opens 12 with 10 in color on a 24-bud spike. It's heavily ruffled and has many top awards to its credit. It's your potential grand champion.

(Blbts. 20—25c; 100—\$1.00)

SILVER LUSTRE (Moses-'51) 85 days-566

An entirely different color in Glads. It is a light blue-lavender with not a trace of rose or pink. A small feather of deeper lavender in the throat, outer edges of petals flushed slightly deeper. It's a true color sport of Elizabeth the Queen, and carries all the Queen's good habits.

(L. ea. 20c; 10—\$1.60) (M. 2—30c; 10—\$1.20) (S. 10—80c)
(Blbts. 15—25c; 100—\$1.50)

SPIC & SPAN (Carlson-'46) 80 days-442

Ruffled deep pink which will win on number and length of flower head. Has 20-22 buds with 10 open in excellent placement. Grows good cutting spikes from small bulbs. Practically disease resistant.

SPOTLIGHT (Palmer-'44) 80 days-413

Very large, wide open, round florets in deep yellow with attractive small scarlet blotch. Free bloomer and good propagator.

SPRITE (Palmer-'52) 88 days-320

Bright yellow-orange, deeply ruffled and of heavy texture. This is one that will help to further popularize the 300 class Glads. 4-inch florets on a 17-bud spike opening 7 to 8 at a time. A crisp, clean color in a delightful form.

(L. ea. 35c; 10—\$2.80) (M. ea. 25c; 10—\$2.00) (Blbts. 15—25c; 100—\$1.50)

STERLING (Harris-'50) 85 days-466

Phlox-purple with a rose feather in the throat. Ruffled, tall, makes nice arrangements with yellows or whites.

(L. ea. 25c; 10—\$2.00) (M. 2—35c; 10—\$2.80)

STORMY WEATHER (Barrett-'47) 82 days-480

A rose-ash with tall spikes and 7 to 8 florets, 4½ inches in diameter, open. Well placed blooms and good attachment makes this one a good smoky.

(L. ea. 25c; 10—\$2.00) (M. 2—30c; 10—\$1.20) (S. 10—65c) (Blbts. 20—25c)

SUNDANCE (Almey-'49) 87 days-412

Ruffled medium yellow self. Opens 8 to 12 blooms, 5 inches in diameter on a 26-bud flower head. It stands heat well, has good placement, excellent attachment and opens to the tip.

(L. ea. 20c; 10—\$1.60) (M. 2—30c; 10—\$1.20) (Blbts. pkg. 25c)

SUNNY CHIP (Schafer-'53) 80 days-421

Again one of the best varieties out of a total of 500 we are growing. Rugged green foliage and plant producing tall spikes carrying 17 to 18 buds and opening 6 with 7 showing color. The color is orange-apricot with small vermilion feather on lower petal. Very ruffled floret with extremely heavy texture.

(L. ea. \$2.00; 10—\$16.00) (M. ea. \$1.50; 10—\$12.00)
(S. ea. \$1.00; 10—\$8.00) (Blbts. 5—50c)

SUSAN K. (Mikle-'53) 75 days-440

Beautiful ruffled pink with a creamy yellow throat, giving it a much warmer tone than Friendship. Ideal for florist and will have commercial value as a flower. Grows 4 feet tall, with 16-18 buds and with 5 to 6 open. Has strong attachment and is a good propagator. One you should have in your garden.

(L. ea. 60c; 10—\$4.80) (M. ea. 40c; 10—\$3.20) (S. ea. 30c; 10—\$2.40)
(Blbts. 10—30c)

THE RAJAH (Jack-'51) 88 days-570

Very outstanding new purple. 7 to 8 ruffled, heavy textured blooms on a 5-foot spike. Very healthy and reliable.

(L. 2—35c; 10—\$1.40) (M. 2—25c; 10—\$1.00) (S. 2—30c; 10—60c)
(Blbts. pkg. 25c)

THE ROAN (Pruitt-'49) 85 days-590

Rosy red with silvery lines laid on the entire surface giving an unusual color effect. It is one of the most unusual and appealing Glads I have seen. The lines are so close together and so nicely parallel that they blend with the color to make a beautiful tone.

GLADIOLUS

SEED

There is a great thrill in raising gladiolus from seed. The elements of chance and suspense appeal to all of us. We are willing to gamble a little time on the hope that we may be able to produce a wonderful new glad. There are a few cataloguers who offer seed for sale. As an answer to many requests we are mailing available to our customers both open pollinated (chance) and hand pollinated seed.

OPEN POLLINATED SEED (chance)

We have carefully selected parents from which to take selected chance seeds. These were in our Trial Gardens where some of the best varieties have a chance to cross pollinate. We are offering these seeds in limited quantity. Please state whether you want seeds taken from large type or miniature gladiolus.

PACKET of 50 or more hand selected CHANCE SEED - 35¢ per packet

HAND POLLINATED GLADIOLUS SEED

With the assistance of a capable and successful hybridist, we are offering the following list of hand pollinated seeds. He has studied and applied his knowledge for several years in hybridizing Mums and Glads.

Following is a list of his crosses he offers this season. We are offering these for 50¢ per packet and each packet contains 25 plump seeds.

PLANT in good fertile soil covering lightly, not over 1 inch when the ground warms up in the spring (when Maple leaves begin to open). Keep the ground loose and free from weeds all through the growing season and water every week or two with a solution of Rapidgro after they are well started. Dig in the fall and care for as you would small gladiolus bulbs grown from bulblets. If you wish an added thrill, keep them under label until you see them bloom. Only a limited number of each cross available, PLEASE GIVE SECOND CHOICE.

Very truly yours,

GLOXINIAS

These brilliantly colored flowers are easily grown. We do not know of any other house plant that responds so quickly. Velvety flowers last for months, making a stunning effect between the soft, handsome leaves. Bulbs can be planted from early February to late May, to make a succession of flowers.

Place one bulb in a 5-inch pot filled with good rich, sandy loam. Cover bulb about one inch, water sparingly. Place in a warm, sunny window or conservatory.

Giant American Hybrid Tuberos Begonias

The Shade Loving Plants. The Answer to That Problem Corner.

Start them early in damp peat moss or vermiculite in a warm place. As growth starts, transplant to 4- or 5-inch pots, or if ground is warm, directly to the permanent beds. Use two parts of good soil and rotted manure, two parts leaf mold or peat moss, one part sand; 3 lbs. bone meal to a bushel of mixture.

These Giant American Hybrids are unsurpassable for their vivid colors. The size of the flower is unbelievable, making blooms 5 to 8 inches in diameter. Buy American if you want the best.

DOUBLE CAMELLIA TYPE

Double as a Rose and as pictured on this page. Can supply in the following colors, but please give a second choice, in case we are out. WHITE, PINK, YELLOW, APRICOT, DARK RED, SCARLET and MIXED.

DOUBLE FIMBRIATA TYPE

(Double frilled or Carnation type). Immense, fully double blooms with crinkly edges in the same colors as the Camellia type. PINK, YELLOW, SCARLET, MIXED.

Prices and size the same as the Camellia Type.

ACIDANTHERA MURIELAE

(Sweet Scented Gladiolus)

A vigorously growing Gladiolus-like bulb which produces highly scented flowers in late summer. The fragrance is delightfully fresh and soft, yet insistent. A few spikes in a vase will make themselves pleasantly known throughout the living room. Flowers are white with brilliant and clear purple marking in centers, length of stem about 2 to 2½ feet. In mild climates the bulbs may be left in the ground where they will soon form good sized clumps. In colder sections, dig and store as Gladiolus bulbs.
